Re: Sinclair Oil & Gas Company's  
Hackberry Hills Unit lease,  
Well No. 4

Dear Sir:

On August 4th, this company filed Form C-104 requesting approval to truck to pipeline approximately 430 barrels distillate recovered from our newly completed Hackberry Hills Unit lease, Well No. 4, during the testing of the well.

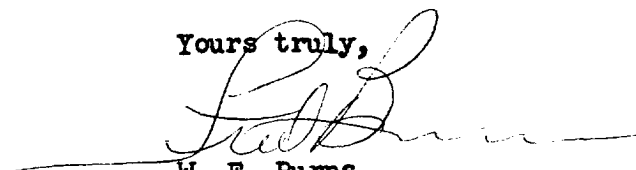

Under Section V of the referenced C-104, the actual prod. test-MCF/D was shown in error as 125,856. This figure should have been shown as 13,574 (Calculated open flow) as based on results of the 4-point test taken 7-19-66 and reported on Form C-122. Also, the length of the Test was shown on the C-104 as 1 hr., this should be corrected to 4 hours (4 Pt. Test) and the bbls. condensate/MMCF as shown thereon should be corrected to 45.67.

Inasmuch as the referenced C-104 was filed only for approval for the sale of the 430 bbls. distillate recovered during the testing of the well and was not filed as a request for gas allowable, it is requested that this letter serve to correct the above referenced errors on the Form C-104.

At such time as a transporter of gas is connected to this well, Form C-104 will be filed requesting allowable with all five sections of the Form C-104 filled out completely.

If further information is needed, please advise.

Yours truly,

  
W. F. Burns  
Superintendent
