ARTESIA OFFICE

Dear Sir:

*Robert Gressett*

While completing our Springs Unit No. 1, located in Unit G, Section 34, 20-S, 26-E, undesignated pool, approximately 230 barrels of condensate was produced. This well has now been completed as a closed in gas well, waiting on gas transporter to connect.

In order to dispose of this production, it is requested that an allowable of 230 barrels be granted for the month of December, 1966.

The Permian Corporation will be the transporter.

Yours truly,

*C. D. Borland*
