Re: Yates Federal No. 1 P, 32-20-29,
Wildcat Strawn Pool, Eddy County,
New Mexico

Gentlemen:

Enclosed please find June, 1967, Supplement No. A 29 which authorizes a 500 barrel testing allowable for the subject well. By your letter of June 9, 1967, an additional testing allowable of 500 barrels for "future testing" was requested. However, this office has received a copy of Federal Form No. 9-330, "Well Completion Report", which shows the well to be a completed shut-in gas well. Rule 404 (a) Commission Rules & Regulations prohibits the venting or non beneficial use of gas from gas wells after their completion. Therefore, your request for additional testing allowable must be denied. Applications for additional testing of completed non-connected gas wells should be addressed to our Santa Fe office.

If there are any questions on this matter do not hesitate to call upon me.

Very truly yours,

OIL CONSERVATION COMMISSION

R. L. Stamets
