Re: Yates Federal No. 1
Section 32-20S-29E
Eddy County, New Mexico

Gentlemen:

On June 8, 1967, we ran a temperature survey on the above captioned well, which indicated we had a channel up to the Wolfcamp formation at approximately 10,500'. As a result of this, we filed Form 9-331 with the U.S.G.S. in Artesia, New Mexico, indicating an attempt would be made to rework the well in an effort to make a Strawn producer. This will result in the necessity of doing additional testing to determine the productivity of this well. This was the purpose of our letter dated June 9, 1967, at which time we requested an additional 500 barrels test allowable. Your reconsideration in this matter will be appreciated.

Very truly yours,

J.M. HUBER CORPORATION

Floyd L. Meade
District Production Supt.
