Gentlemen:

Gas Well Shut-In Pressure Report - NMOCC Form C-125

Attached is the subject shut-in pressure report for Levers Federal No. 2, Catclaw Draw Morrow (Gas), as requested by Mr. R. L. Stamets, NMOCC, Santa Fe, New Mexico.

A report was also requested for Levers Federal No. 2, Springs Upper Penn (Gas). We are unable to comply with this instruction, as the No. 2 well is a single Morrow completion.

Exemption to NMOCC rule 402 is requested for Levers Federal No. 1, Springs Upper Penn (Gas), located in Unit Letter E, Section 2-21S-25E. This well produces between 1000 and 1500 barrels of water per day. It will log-off, if it is shut-in. Due to the quantity of fluid, the cost to restore production, if it can be restored, would be excessive.

Yours very truly,

L. P. Thompson
Division Manager
