Subject well temporarily abandoned 2/13/71 due to junk in hole and unable to recover at total depth 295'. After talking with Mr. Gressett recently, we proposed to set a plug below an indicated water zone at 100', and again temporarily abandoning hole with the idea of possibly using water from it for future drilling on the unit. On 9/3/71, the hole was cleaned out to 200' with tbg., an 80' plug was set (Denton Cmt. Co.) 200 to 120' with 100 sx. Incor cement. A metal plate was placed over top of hole, well now plugged back to 120'.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
