13. Describe Proposed or Completed Operations (clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work and approximate duration thereof. If the proposal is to deepen directionally or recomple horizontally, give subsurface locations and measured and true vertical depths of all pertinent markers and zones. Attach the Bond under which the work will be performed or provide the Bond No. on file with BLM/BIA. Required subsequent reports shall be filed within 30 days following completion of the involved operations. If the operation results in a multiple completion or recomple in a new interval, a Form 3160-4 shall be filed once testing has been completed. Final Abandonment Notices shall be filed only after all the requirements, including reclamation, have been completed, and the operator has determined that the site is ready for final inspection.)

The subject well is currently producing at 60 MCFPD from the Morrow "B" zones. The Morrow "C" zones were producing 300-500 MCFPD when abandoned in 1982 and were still increasing in production (cleaning up) from a 1978 casing leak repair. Hallwood recommends drilling out 2 cast iron bridge plugs in this well, reperforating, acidizing and commingling the Morrow "B", "NBS", and "C" zones to increase production (see attached well schematic).
