13. Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

The pressure building up on the tubing and casing is killing the backside (the gas flow). The pumper will keep the pressure bled off of the tubing and casing. This should cause the rate to increase - average rate 6/19/92-6/26/92 - 230 MCF.
