Dear Sir:

Our Cerf-Federal No. 1, located 660' FNL & 1980' FWL, Section 10, 21-S, 27-E, produced approximately 225 barrels of condensate while testing the Burton Flat Strawn zone. This well is now closed in, waiting on pipe line connection.

In order to dispose of this production, it is requested that a testing allowable of 225 barrels be granted for the month of August, 1973.

The Permian Corporation will be the transporter.

Yours truly,

  
C. D. BORLAND

lwd:
