Re: Gas Well Gas Commingling

State of New Mexico
Energy and Minerals Department
Oil Conservation Division
P. O. Box 2088
Santa Fe, NM 87501

Attention: R. L. Stamets

Amoco Production Company proposes to connect the Emperor Oil Company Gas "B" Federal Com #1 and the Federal "G" Gas Com #1 into a common sales line. Consequently, the gas well gas from the two wells will be commingled upstream of the sales meter. We will set up an allocation meter for each well that will indicate the individual well production as shown on the attached schematics.

Therefore, Amoco Production Company respectfully requests approval of the proposed gas meter installations.

If further information is required, please contact Steve Brownlee at (505) 393-1781, Extension 2250.

J. L. KRUPKA
