Gentlemen:

Please find attached the Multipoint and One Point Back Pressure Test for Gas Wells as required by Rule 401 for the Government R #1, Section 14-T20S-R28E, Eddy County, New Mexico.

Following the agreement made during our phone conversation of November 19, 1973, the original (pre-connection) multipoint test submitted September 10, 1973, has been analyzed and pressure build-up and flow data indicate flow conditions have stabilized during this test.

We are, therefore, submitting this One Point Back Pressure Test utilizing current flow rate data and the slope as calculated on the test submitted September 10, 1973.

Sincerely yours,

George Davis
Region Petroleum Engineer
