Sample chamber at 10,393' contained 400 cc condensate at a gravity of 55° API and 40°F and 5.8 cu. ft. gas at 900 psig. Recovered from DP 20' - 51° API condensate, 1100' wtr. blanket cut w/mud and 8' of condensate and wtr. cut mud. Caught gas sample which analyzed as follows: S.G. 0.6595, CO₂ .34 molc.%, N₂ 1.38% methane 88.61% ethane 6.01%, propane 2.28%, GPM 2.75. BTU dry basis 1105, wet basis 1086.
