O. C. D.

ARTESIA, OFFICE

Present Well Status:

7" casing set at 10,414'. PBDT 9996'. CI Bridge w/2 sk cmt cap.
Strawn zone perfs: 10,102' to 10,253', 4 JSF.
Wolfcamp zone perfs: 9836' to 9846'.
2-7/8" tbg w/7" retrievable packer set at 9476'

Completed in 1974 as a South Carlsbad Wolfcamp gas well. This zone has depleted.

Proposed Operations:

Squeeze off and P&A present Wolfcamp perfs. (9836 - 9846). Drill out cmt cap and cast iron Bridge plug above Strawn zone perfs (10,102 - 10,253). Attempt recompletion in the Strawn zone. Run 1 string of 2-7/8" tbg w/pkr set at approx. 9850'. Stimulate old Strawn perfs (10,102' - 10,253'), and attempt to establish commercial gas production from Strawn zone.

Present Casing & Cementing Record:

<u>Hole Size</u>	<u>Casing Size</u>	<u>Depth</u>	<u>Sacks Cement</u>
26"	20"	207'	700 sk Circ.
17-1/2"	13-3/8"	2249'	1500 sk Circ.
12-1/4"	9-3/8"	5325'	1260 sk - TOC @ 2230'
8-3/4"	7"	10414'	615 sk - TOC @ 8330'

Our plans are to start this work immediately.
