(NOTE: Report results of multiple completion on Well  
Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)\*

This well is a triple completion in the Morrow, Strawn and Wolfcamp. The cumulative production from the Morrow is 549 Bbls. Cond & 466,956 MCF gas; from the Strawn 843 Bbls. Cond. & 34,801 MCF gas and 16,176 Bbls. Cond. & 212,617 MCF gas from the Wolfcamp. The Strawn and Morrow are depleted and Wolfcamp has developed a tubing leak. Production from the Wolfcamp prior to tubing leak was 130 MCF gas per day and 6 Bbls. Cond.

The Morrow & Strawn tubing strings will be salvaged from the well and CIBP set @ 11,000' & 10,250' w/ 40' cement on top of each bridge plug. Replace bad joints in Wolfcamp tubing string and return well to Wolfcamp production.

18. I hereby certify that the foregoing is true and correct
