Dear Mr. Gressett:

In reply to your letter of July 14, 1975, concerning the Form C-104 on the above referenced well, the perforations are actually as you have them on previous reports, i.e. 10,884-893' and 10,908-916'. The top of the Morrow Clastic was erroneously picked up and reported as the top of the perforated interval on the Form C-104. Should you wish a corrected C-104 submitted, please advise.
