DD-56 NSB/HN  
Operator proposes to re-enter the P&A'd Simpson A #1 wellbore (shown on attached plat), and directionally drill to an orthodox location in the NW/4 SE/4 of Sec29-T21S-R27E. Operator has attempted to drill a vertical well in NW/4 SE/4 of said section, but massive lost circulation problems have prevented drilling below 2000'. The Simpson A wells #2 and #2Y were the attempted vertical wells. To allow the operator to keep drilling rig under contract, the re-entry will begin as soon as the #2Y well is properly plugged, which should occur no later than November 1, 1990.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
