ATTN: Mr. Leslie A. Clements

Dear Mr. Clements:

In response to your letter of January 31, 1984, the Perry R. Bass Big Eddy Unit No. 40 is still temporarily shut in. Until we can determine a method to produce the well while economically disposing of the produced water, we recommend the well be left in this state. As previously noted, the well is capable of producing 495 MCFPD, 10 BCPD and 700 BWPD. Please feel free to contact Mr. John Rodgers if additional information is required.

Very truly yours,

J. E. Pullig
Division Manager
