

Details of Chokeline-Manifold Test

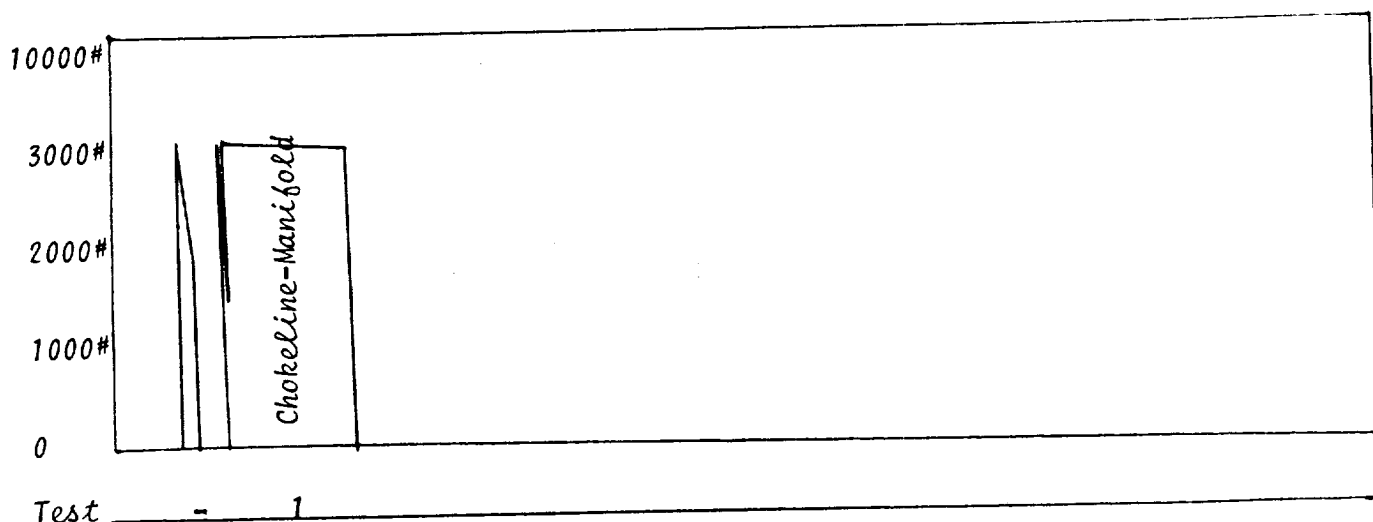

J. M. Huber Corporation

Allen State Commission #1

Contractor: McVay Drlg. Rig 4

Test by Yellow Jacket Tools and Services, Inc.

=====Transposition of the pressure recorder chart=====

The above is a transposition of the pressure recorder chart covering test to the chokeline -manifold in service on your well drilling in the Carlsbad, New Mexico Area, Midland District, Texas. Results of tests are as follows:

---

TESTING: Chokeline-Manifold with outside valve closed off stack on chokeline and all valves closed off choke-manifold cross - pressure applied thru guage connection.

Test #1 Pressured to 3000# with leak to flange between outside valve off stack and chokeline. Tightened.

Test #2 Repeated test. Pressured to 3000# with loss of pressure; re-pressured to 3000# with loss of approximately 100# during first fourteen minutes then leveling out for remaining one minute of test.

NO VISIBLE LEAK. PRESSURE LEVELING OUT TOWARDS APPROXIMATELY 2900#.
