T.D. 1793' (No returns), top of the caved in hole @ 1674'. Shut-in water well. This well was drilled to a T.D. of 1793' and the hole was lost at this depth. The rig was skidded 100' south and the Elizondo-Federal A No. 2Y was drilled and completed as its stead. After losing the hole at a T.D. of 1793', this well was converted to a water supply well for the drilling of the #2Y well. 1 jt. of slotted 7" and 5 jts. of regular 7" casing was run and set @ 247' with a 4" high lift centrifugal pump set in the 7" casing @ 220'. After the completion of the drilling of Well No. 2Y, the 7" casing and pump was pulled and the water well is now shut-in with a container over the 13-3/8" surface casing which was cemented and left in the hole.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
