Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)

We are trying to evaluate the drilling activity in this area, at present this well would lose money each month if we produced it from its current perforations, we request that this well be put in T/A status until we can determine if this well has any uphole potential, to be measured against the wells being recently drilled.
