

Mr Bill Gressett

Enclosed is a C-104 covering the Nix # 2 Fasken Federal. I was in a little bind on this thing in that it didn't appear that we were going to make a well in the Morrow. With the plug back we have a small well in the Atoka which may need to be treated. We plan to produce it a few days and take pressure build up test. The well was connected to the Southern Union connection since they had not removed it from the well. I dont know if El Paso will want to reconnect or not.
