I hereby certify that the above is true and complete to the best of my knowledge and belief.

No well will be assigned an allowable greater than the amount of oil produced on the official test.
During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Commission.
Gas volume shall be measured by a meter of the type approved by the Commission and a 10 percent tolerance in the gas-oil ratio shall be allowed.
Report of test shall be filed with the Commission within 10 days of completion of test. Operator shall record test with Rule 301 and operating record book.
