Re: Elizondo Federal
#2Y-K-21-21-27

Gentlemen:

This letter is initiated by your request to perforate the interval 10,781-10,790, 11,113-11,118. If said interval is perforated, this would create a downhole commingling situation according to New Mexico Oil Conservation Division Nomenclature Committee tops.

I have for your convenience listed my correlations of said well;

Wolfcamp	8,806
Penn	9,945
Strawn	10,168
Atoka	10,590
Atoka Datum	10,822
Morrow Ls.	11,072
Morrow Cl.	11,240

The cross section log used is the Cities Service Co., Cawley A #1, 1980 FSL and 1980 FWL of 28-21S-27E, H-H #13.

Please contact this office if you have any questions in regards to rectifying this situation.

Sincerely,

Larry Brooks
Geologist
