OIL PRODUCER 611 THE PETROLEUM BUILDING MIDLAND, TEXAS 79701

September 4, 1974

United States Department of the Interior Geological Survey P.O. Drawer U Artesia, New Mexico 88210

> RE: Jake L. Hamon's Federal 9 COM No. 1 Lease Nos. NM 11334 and NM 01119 Section 9, T-21-S, R-27-E, NMPM Eddy County, New Mexico

Gentlemen:

Enclosed please find six (6) copies of Form 9-331-C with attached surveyor's plats on the above captioned well. Attached to each Form 9-331-C is the following ecology information:

- 1. Well location and existing area roads.
- 2. Planned access road.
- 3. Location and type of water supply.
- 4. Proposed tank battery and flow line location.
- 5. Location layout.
- 6. BOP Hook-up.
- 7. Area well location plat.

There will be no airstrip or camp at this well location.

Waste material which will include bore hole cuttings and drilling mud will be placed in the open reserve pit. This material will be allowed to dry by evaporation and will then be covered with the original surface soil.

When pits are all dry and covered, the location will be leveled to conform to the general contour of the surrounding land.

Please contact Mr. H.W. Shaw, phone 915-682-5218, Midland, Texas in reference to the development plan for surface use.

We hope that this information satisfies all of your requirements. Should there be any additional information which you desire, please do not hesitate to call upon us.

Very truly yours,

Jake L. Hamon
