

Test #24 Repeated test. Pressured to 3000# with same leak.

---

RETEST: Pipe Rams same as before but with outlet valve closed off choke-manifold cross, outside wing valve closed off manifold cross (pump side), and outside wing valve off manifold cross (pipe rack side) bull plugged - pressure applied as before.

Test #25 Pressured to 3000# with leak thru pipe rams; operated rams under pressure; repressured to 3000# with same leak; operated rams under pressure; repressured to 3000# with leak thru outlet valve off choke-manifold cross. Operated valve.

Test #26 Repeated test. Pressured to 3000# with same leak.

---

RETEST: Pipe Rams same as before but with outlet valve off choke-manifold cross bull plugged, outside wing valve closed off manifold cross (pump side), and outside wing valve off manifold cross (pipe rack side) bull plugged - pressure applied as before.

Test #27 Pressured to 3000# with loss of approximately 100# during first eleven minutes then leveling out for remaining one minute of test. Released pressure to 1500# and closed Hydril.  
NO VISIBLE LEAK. PRESSURE LEVELING OUT TOWARDS APPROXIMATELY 2900#.

---

RETEST: Hydril with valves same as before.

Test #28 Pressured to 1500# with loss of approximately 100# during first ten minutes then leveling out for remaining one minute of test.  
NO VISIBLE LEAK. PRESSURE LEVELING OUT TOWARDS APPROXIMATELY 1400#.

---
