17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.) *

Propose to abandon this hole at a depth of 270'. There is now a dev. of 5° off and the driller feels it would be better to start over with a new hole. They have had this problem since Feb. 19 when they were at a depth of 85', and up until this time they have been able to straighten the hole but feel now that it is too far off.

We will move 10' to the South and start a new hole, which will be the Yates Cherokee 1-Y

The hole will be filled with heavy mud and/or cuttings and a 20' Cement plug at the surface.

Request marker be waived as only 10' from new hole.
