NEW MEXICO OIL CONSERVATION COMMISSION
PACKER SETTING REPORT

I, Peck Hardee, Jr., being of lawful age and having full
Name of party making report
knowledge of the facts hereinbelow set out do state:

That I am employed by Harvey E. Yates Co., Inc. in the capacity of
Petroleum Engineer, that on September 26, 19 75

I personally supervised the setting of a Otis Perma-Latch, 5-1/2 inch
Make & type of packer

in Harvey E. Yates Co., Inc., Cedar Hills Unit,
Operator of well *Lease name*

Well no. 2 located in the Burton Flat field,

Eddy county, state of New Mexico, at a subsurface depth of

10,223* feet, said depth measurement having been furnished me by

Calculations from tubing and tool measurements;

That the purpose of setting this packer was to effect a seal in the annular space between two strings of pipe where the packer was set so as to prevent the commingling, in the bore of this well, of fluids produced from a stratum below the packer with fluids produced from a stratum above the packer; that this packer was properly set and that it did, when set, effectively and absolutely seal off the annular space between the two strings of pipe where it was set in such manner as that it prevented any movement of fluids across the packer.

RECEIVED

DEC 11 1975

Peck Hardee, Jr.
(Signature)

Consulting Engineer
(Title)

12/10/75
(Date)

O. C. C.
ARTESIA, OFFICE

*Note: Packer in conjunction with Otis Cross Over Assembly separates Morrow and Strawn zone flow. Morrow produced through tubing - Casing Annulus above packer; Strawn produced through tubing.
