

DEVELOPMENT PLAN FOR SURFACE USE

GOLDEN FEDERAL #1
910' FNL and 660' FWL SECTION 33-20S-30E
EDDY COUNTY, NEW MEXICO

1. Existing roads are shown on the attached Geological Survey map, and also on a 1" = 4000' scale county map.
2. It will be necessary to build only about 100' of road into our location from the existing north-south road. Road width will be about 25', and will be compacted rather than surfaced.
3. See attached county map.
4. See attached county map.
5. See attached county map.
6. Water for drilling will be hauled.
7. Cuttings will be disposed into the reserve pit. Garbage and trash will be buried in a small, separate pit near the reserve pits.
8. Not Applicable.
9. Not Applicable.
10. A layout diagram for Moranco Rig No. 8 is attached. The drilling pad will be compacted.
11. All pits will be covered and the location levelled.
12. The topograhpy is very generally rolling hills. The country has very little vegetation with some greasewood trees.

Representative responsible for compliance with Development Plan for Surface Use:

David G. Griffin
Vice-President
