

- (3) Residences and Buildings: The nearest house is one mile south-west of the location.
- (4) Arroyos, Canyons, Hills, Etc.: The attached topographic map shows the canyons of the area.
- h. Well Sign: Sign identifying and locating well will be maintained at the drill site commencing with the spudding of the well.
- i. Open Pits: All pits containing mud or other liquids will be fenced or guarded.
- 4. Roads:
 - a. Existing Roads: All existing roads within three miles of well site are shown on an attachment.
 - b. Planned Roads: Plan to construct 1-1/2 miles of new 15 ft. wide road with six 15' passing turnouts. The planned road is shown as a dark dashed line on an attachment. The road will be graded, watered and compacted where there is adequate top soil. In spots where only rock is present, caliche will be used to cover the rock. The north half of the planned road will follow a path that has been used by vehicles in the past. Caliche will be purchased by the dirt contractor.
 - c. Fences, Gates and Cattle Guards: A gate or cattle guard will be placed in the fence in the south part of Section 12 as desired by the rancher.
- 5. Tank Battery: This is a gas prospect and no tank battery is anticipated.
- 6. Lease Pipelines:
 - a. Existing: None.
 - b. Planned: None.
- 7. Water Disposal: Well cuttings will be disposed in reserve pit. Barrel trash containers to be in accessible locations within drill site area during drilling and completion procedures. All detrimental waste will be hauled away, burned or buried with a minimum cover of 24" of dirt. A burn pit will be located adjacent, but separate, to the reserve pits. If well is productive, maintenance waste will be placed in special trash cans and hauled away. Any produced water will be collected in tanks and hauled to an approved disposal system.
- 8. Water Supply: Water will be trucked from the nearest commercial source.
- 9. Archaeological Resources: None were observed.
