Proposed Operations: It is proposed to plug the present gas completion in the Strawn and Upper Penn, which show to be depleted, and attempt a completion in the Wolfcamp. Presently, the well is producing less than 100 MCFD through perforations 9456' - 69' and 9682' - 86'. The well should produce oil as indicated by a DST performed when the well was drilled. The proposed perfs are 8458' - 75'. A small clean-up acid job may be needed. The use of surface pumping equipment is anticipated.

IN ABOVE SPACE DESCRIBE PROPOSED PROGRAM: IF PROPOSAL IS TO DEEPEN OR PLUG BACK, GIVE DATA ON PRESENT PRODUCTIVE ZONE AND PROPOSED NEW PRODUCTIVE ZONE. GIVE BLOWOUT PREVENTER PROGRAM, IF ANY.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.

Signed John Munson Title Petroleum Engineer Date 3-31-81
