

7. Methods for Handling Waste Disposal

All waste that can be burned will be burned in a pit located in the north-west corner of the drill site. All other waste and drilling fluids will be buried in a pit and covered with a minimum of two feet of cover.

8. Location of Camps and Airstrips

There will be no permanent structures or airstrips. Trailer locations are shown on the attached location layout sheet.

9. Well Site Layout

See attached location layout sheet.

10. Plans for Restoration of the Surface

Any topsoil removed while digging pits will be stockpiled. The burn pit will be covered and leveled. The reserve pit will be allowed to dry, filled in and leveled. The location will be cleaned, topsoil spread over the disturbed areas and reseeded as directed by the Bureau of Land Management.

11. Other Environmental Information

The immediate area under concern has alkaline soil which is sparsely covered with unidentified native grasses and greasewood shrub. The terrain has a small gully which borders the western side of the well site. There are no water wells, flowing streams or bodies of water in the immediate area.
