

13-POINT DEVELOPMENT PLAN FOR SURFACE USE

SHELL OIL COMPANY

FEDERAL 6 NO. 1

3193' FNL AND 660' FEL OF SECTION 6, T-21-S, R-24-E

EDDY COUNTY, NEW MEXICO

1. Existing Roads to Well Location

To reach Shell Federal 6 No. 1, proceed northwest from Carlsbad on U. S. 285 12 miles. Turn left on State 137 and go 10 miles and turn right on BLM 6310 and after 2.4 miles, turn right on BLM 6315 and proceed 3.6 miles, at which point a drilling company sign will be placed pointing in a westerly direction to the well site. Turn left on temporary access road and go 2/3 of a mile to well site.

2. Planned Access Road

As shown on the attached Bureau of Land Management map, the planned 12-foot wide access road will leave BLM 6315 road and go 3500' in a westerly direction to the well site. Care will be taken to construct the road in such a manner as to minimize surface disturbance.

3. Location of Existing Wells

Location of existing wells is shown on the attached ownership plat with a scale of 1" = 4000'.

4. Location of Tank Batteries, Production Facilities, Etc.

This is Shell's first well in this field, and no permanent production facilities are planned at this time. However, we plan to install temporary facilities for testing purposes. A location layout sheet showing these test facilities is attached. Should commercial production be encountered, we will consult with and follow the directions of the Bureau of Land Management in the construction of permanent production facilities.

5. Location and Type of Water Supply

We plan to contract with a private supplier to haul the water to be used during this drilling operation.

6. Source of Construction Materials

Shell plans to use a caliche type material in the construction of the access road and well site. This material will be obtained from an old caliche pit which is located approximately one mile south of the proposed well site.
