This well is presently completed in Morrow perforations 11134-11148 and unable to flow on account of water encroachment. We propose to set a ClBP at about 11128 with 10' cement, perforate and test the Morrow at 11105-11115 and 11021-11026: Will stimulate as needed for production. If non-commercial, will cover with bridge plug and cement, and recomplete in the Atoka through perforations at 10752-10756.

18. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
