750:1	CU.FT/BBL	GAS - OIL	

During gas-oil ratio test, each well shall be produced at a rate not exceeding the top unit allowable for the pool in which well is located by more than 25 percent. Operator is encouraged to take advantage of this 25 percent tolerance in order that well can be assigned increased allowables when authorized by the Commission.

Gas volumes must be reported in MCF measured at a pressure base of 15.025 psia and a temperature of 60° F. Specific gravity base

will be 0.n0. Report casing pressure in lieu of tubing pressure for any well producing through casing.

Rule 301 and appropriate pool rules. Report casing pressure in lieu of tubing pressure for any west provides more and one copy of this report to the district office of the New Mexico Oll Conservation Commission in accordance with
