RE: Federal RV 4 #1  
Ju O, Sec. 25,<sup>4</sup> T-22-S, R-25-E  
Eddy Co., New Mexico

Dear Sir:

Due to the relative low volume of salt water produced from the Revelation wells, disposal facilities were never installed at referenced well site because economics would not justify installation. One of the existing field wells is now a very marginal producer and will possibly require recompletion during the first half of 1985. As a result we propose to retain the current status of the Federal RV 4 #1 until upper intervals have been fully evaluated.

Yours very truly,

BELNORTH PETROLEUM CORPORATION

  
Carl M. Houser  
Production Superintendent
