

- E. Trash, waste paper, garbage and junk will be buried in a separate trash pit and covered with a minimum of 24" dirt. All waste will be contained to prevent scattering by the wind. Location of trash pit is shown in Exhibit "D". All trash and debris will be buried within 30 days after finishing drilling and/or completion operations.

8. AUXILIARY FACILITIES: None required.

9. WELLSITE LAYOUT:

- A. Exhibit "D" shows the relative location and dimensions of the pad, mud pits, reserve pit and trash pit.
- B. Only minor levelling of the wellsite will be required. No significant cuts and fills will be necessary.
- C. The reserve pit will be plastic lined.
- D. The pad and pit area will be staked and flagged.

10. PLANS FOR RESTORATION OF THE SURFACE:

- A. After completion of drilling and/or completion operations all equipment and other material not needed for operations will be removed. Pits will be filled and location cleaned of all trash and junk to leave the wellsite in as aesthetically pleasing a condition as possible.
- B. Any unguarded pits containing fluids will be fenced until they are covered.
- C. After abandonment of the well pits will be filled and location will be cleaned. The pit area, well pad, and all unnecessary access roads will be ripped to promote revegetation. Rehabilitation should be accomplished within 90 days after abandonment.

11. OTHER INFORMATION:

- A. Topography: Land surface is relatively flat sloping gently from west to east.
- B. Soil: Soil is Sandy Loam.
- C. Flora and Fauna: (See Exhibit "C") The vegetative cover is generally sparse and consists of mesquite, yucca, sandsage and perennial native range grasses on the west of half of the west half of the section. The location site is farm land now in alfalfa and is irrigated. Wildlife in the area is that typical of semi-arid desert land and includes coyotes, rabbits, rodents, reptiles, dove and quail.
- D. Ponds and Streams: Ponds are located at each irrigation well (40'x40') as indicated on Exhibit "C".
- E. Residences and Other Structures: The nearest occupied dwelling is a ranch house  $\frac{1}{2}$  mile south of the well site. The nearest water well is  $\frac{3}{4}$
