

December 14, 1976

5. Location and Type of Water Supply.

Fresh and brine water will be purchased and trucked to the well site over the existing and proposed roads.

6. Source of Construction Materials.

Caliche for surfacing the road and well pad will be obtained from a State pit located NW/NE Section 21-20S-28E..

7. Methods of Handling Waste Disposal.

A. Drill cuttings will be disposed of in the drilling pits.

B. Drilling fluids will be allowed to evaporate in the drilling pits until pits are dry.

C. Water produced during tests will be disposed of in the drilling pits. Oil produced during tests will be stored in test tanks until sold.

D. Current laws and regulations pertaining to the disposal of human waste will be complied with.

E. Trash, waste paper, garbage and junk will be buried in a separate trash pit and covered with a minimum of 24 inches of dirt. All waste material will be contained to prevent scattering by the wind. Location of trash pit is shown on the well site layout.

F. All trash and debris will be buried or removed from the well site within 30 days after finishing drilling and/or completion operations.

8. Ancillary Facilities.

A. None required.

9. Well site Layout.

A. A plat of the well site is attached which shows well pad, mud pits, reserve pit, trash pit and location of major rig components.

B. The reserve pit will be plastic lined.
