

Supplement to Multi Point Surface Use and Operations Plan
Government AD No. 2

January 13, 1977

Page No. 2

All but 660' (40 rods) of the access road and the location itself is on land administered by the BLM. Cities Service Oil Company will comply with the requirements listed in "Standard Stipulations for all Drilling in Relation to Oil and Gas Activities in the Roswell District".

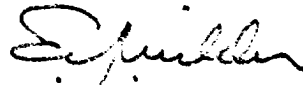

After abandonment, any special rehabilitation and/or revegetation requirements of the BLM will be complied with and accomplished as expeditiously as possible. All pits should be filled and levelled within 90 days after abandonment.

Manuel Elizondo, P. O. Box 548, Carlsbad, New Mexico, is the surface owner of the E/2 of the NW/4 Section 28-21S-27E. Forty (40) rods of the access road will be on his land. We are currently negotiating a damage settlement and surface restoration agreement with Mr. Elizondo. After abandonment of the well, the access road will be ripped to promote revegetation. Rehabilitation should be accomplished within 90 days after abandonment.

The remainder of the information contained in our original "Application to Drill" dated December 8, 1976 remains unchanged.

I hope this is sufficient information and regret the necessity of having to submit this supplement.

Yours very truly,

E. Y. Wilder
Region Operations Manager
Southwest Region
E & P Division

EYW/lis
