13. If applicable, propose or complete operations. (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. SEE RULE 1103.)

The previously producing Atoka sand zone 10,382'-10,390' has been depleted. We propose to cement squeeze the existing perforations 10,382'-10,390' and pressure test for positive shut-off. Then drill out cement with a reverse unit, run correlation log and perforate an Atoka lime zone from 10,608' to 10,620' with 2 jet shots per foot acidize and test for commercial gas production. We anticipate this work will commence on March 31, 1978.

14. I hereby certify that the information above is true and complete to the best of my knowledge and belief.
