Describe Proposed or Completed Operations (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work) SEE RULE 1103.

The morrow zone in this well has not produced since Nov. of 1979. At that time this zone was swabbed tested and the swab line parted, leaving swab, sinker bars and 2000' wire line in tbg. Now we are producing the Wolfcamp only thru the csg. To shut this well in at this time would probably kill the Wolfcamp and cause extensive expenses to start producing again. Therefore we would like to leave this well as is.

I hereby certify that the information above is true and complete to the best of my knowledge and belief.
