

3. Location of Existing Wells: There are a number dry or abandoned wells in the area, but the nearest producing wells are the Antweil Macho Norte #1 and the Antweil Mesa Macho #1 which are approximately .5 & 1.0 miles south respectively and the Penroc-Fowe Federal #1 one mile N.E. of proposed location. All of the wells in the area, dry, abandoned or producing, are shown on Exhibit "B".
4. Tank Batteries, Production Facilities and Lease Pipelines: Should production be encountered, the tank battery and other required production equipment will be located on the well pad. All production lines will be constructed on well pad and above ground. Refer to Exhibit "D".
5. Water Supply: Water for drilling will be purchased from a supplier and transported by truck to the wellsite over the existing and proposed roads shown in Exhibits "A" and "B".
6. Source of Construction Material: Caliche will be obtained from an existing pit in SE $\frac{1}{4}$ of NE $\frac{1}{4}$ Sec. 1-T20S-R27E, or NE $\frac{1}{4}$ of NE $\frac{1}{4}$ Sec. 36-T19S-R27E, and purchased from B. L. M. or State by contractor. Construction material will be hauled over existing roads to the proposed new road and drillsite. Refer to Exhibit "B" for location of pits and haul roads.
7. Methods of Handling Waste Disposal:
 - A. Drill cuttings will be disposed of in the drilling pits.
 - B. Drilling fluids will be allowed to evaporate in the drilling pits until pits are dry.
 - C. Water produced during tests will be disposed of in drilling pits. Oil produced during tests will be stored in test tanks until sold.
 - D. Current laws and regulations pertaining to disposal of human waste will be complied with.
 - E. Trash, waste paper, sacks, garbage and junk will be burned or buried in a separate trash pit and covered with a minimum of 24 inches of dirt. All waste material will be contained to prevent scattering by the wind.. Location of trash pit is shown in Exhibit "C".
 - F. All trash and debris will be buried or removed from wellsite within 30 days after finishing drilling and/or completion operations.
8. Ancillary Facilities: None Required.
9. Wellsite Layout:
 - A. Exhibit "C" shows relative location and dimensions of well pad, mud pits, reserve pit, trash pit and location of major rig components.
 - B. A cut of (3) three feet on the west and south side and a fill of 3 feet on east side will be necessary.
 - C. Reserve pit will be plastic-lined.
 - D. The wellsite and work area, 400 feetx400 feet have been staked.
