

For the purpose of this study, the following definitions were used: *unemployment* was defined as the number of persons who were not employed in any of the 12 months prior to the survey, and *employment* was defined as the number of persons who were employed in any of the 12 months prior to the survey. The unemployment rate was calculated as the number of unemployed persons divided by the total number of persons in the labor force. The employment rate was calculated as the number of employed persons divided by the total number of persons in the labor force. The labor force was defined as the number of persons who were either unemployed or employed in any of the 12 months prior to the survey. The labor force participation rate was calculated as the number of persons in the labor force divided by the total number of persons in the population. The unemployment rate was calculated as the number of unemployed persons divided by the total number of persons in the labor force. The employment rate was calculated as the number of employed persons divided by the total number of persons in the labor force. The labor force was defined as the number of persons who were either unemployed or employed in any of the 12 months prior to the survey. The labor force participation rate was calculated as the number of persons in the labor force divided by the total number of persons in the population.
