ALTERING CASING

ABANDONMENT*

(NOTE: Report results of multiple completion on Well Completion or Recompletion Report and Log form.)

17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

October 27, 1977 Ran drill pipe in hole open-ended to 5,550'. Spotted cement plugs as follows using class "H" neat cement.

Plug No.1	5550'-5400'	150' w/65 sx
Plug No.2	4150'-4050'	100' w/40 sx
Plug No.3	3250'-3150'	100' w/50 sx
Plug No.4	1600'-1500'	100' w/35 sx
Plug No.5	20'-0	20' w/19 sx

The well was capped and properly identified. The pits were fenced and allowed to air dry. After air drying the pits were then busted and allowed approximately two weeks drying time. All trash and debris were cleaned up. Caliche was removed from road and replaced in the excavated area on location. The location has been dozed back into place and water erosion dikes installed. The road has been ripped and loose dirt bladed into place. A barricade was made across the access road to make it impassable. All location restoration and re-seeding has been done to meet all BLM requirements. Final inspection has been made by the BLM and USGS.

18. I hereby certify that the foregoing is true and correct
