17. DESCRIBE PROPOSED OR COMPLETED OPERATIONS (Clearly state all pertinent details, and give pertinent dates, including estimated date of starting any proposed work. If well is directionally drilled, give subsurface locations and measured and true vertical depths for all markers and zones pertinent to this work.)*

Due to hard rock and equipment failures we are altering our drilling prognosis. We will run 170' of 13-3/8" casing and cement to the surface, move out cable tools and move in Moranco Rig #9 and rig up for air drilling, reduce hole to 12 1/4" and air drill to approx 1130', run and cement the 8-5/8" casing, reduce hole to 7-7/8" and air drill until excessive water flow is encountered, then resume drilling with mud as previously proposed. Will be moving in Rotary tools tomorrow 5-24-78.
