Re: Big Eddy Unit Well No. 60  
Unit J, Section 20, T21S,  
R28E  
Undesignated Bone Springs  
Eddy County, New Mexico

Dear Mr. Pullig:

The Oil Conservation Division has no objection to your flaring 7,000 MCF of gas from the above referenced well to determine if sufficient reserves are present to install a sweetening plant.

Because of the hydrogen sulfide content of the gas, it is imperative that the flaring be done only as you outlined in your letter of November 17, 1978.

Yours very truly,

JOE D. RAMEY  
Director
