- C. Water produced during tests will be disposed of in the drilling pits.
- D. Current laws and regulations pertaining to the disposal of human waste will be complied with.
- E. Trash will be buried in a trash pit and covered with a minimum of 24 inches of dirt. All waste material will be contained to prevent scattering by the wind.
- F. All trash and debris will be buried or removed from the well site within 30 days after finishing completion operations.

(8) Ancillary Facilities A. None required

(9) Wellsite Layout

A. Exhibit "C" shows the relative location and dimensions of the well pad, mud pits, reserve pit, trash pit, and major rig components.

B. Only levelling of the well site will be required. No significant cuts and fills will be necessary.

C. The reserve pit will be plastic lined

D. The pad and pit area has been staked and flagged.

(10) Plans for Restoration of the Surface

- A. After completion of operations, all equipment and other material not needed for operations will be removed. Pits will be filled and location cleaned of all trach and junk.
- B. Any unguarded pits containing fluids will be fenced until they are filled.
- C. Any special rehabilitation and revegetation requirements of the surface management agency will be complied with and accomplished as soon as possible. All pits will be filled and levelled within 90 days of completion or abondonment of the well.

(11) Other Information

A. Topography: The land surface ia arid and gently rolling. From an elevation of 3271' at the well site, the surface slopes toward the Southwest for 1/4 mile into Dark Canyon where the elevation is 3250'.

B. Soil: The topsoil is sandy.

- C. Flora and Fauna: This area is sparcely covered by sage brush and native grass. Wildlife in the area is mainly rabbits, rattlesnakes, and coyotes.
- D. <u>Ponds and Streams</u>: There are no rivers, streams, lakes or ponds in the area.
- E. Residences and Other Structures: The location is approximately 1 mile west of the Carlsbad, New Mexico Airport. Clearance has been obtained from the FAA for this location. There are no residences in the area.
- F. Archeological, Historical, and Cultural Sites: None observed in the area.

G. Land Use: Grazing.

H. Surface Ownership: Well site and proposed new road are on Federal Surface.

(12) Operator's Representative:

The field representative responsible for assuring compliance with the approved surface use and operations plan is:

Dale R. Crockett
