

3. Location of Existing Wells

See Exhibit "C".

4. Location of Existing and/or Proposed Facilities

- A. Tank Batteries: Levers Federal No. 1 is 0.5 miles south.  
See Exhibit "C".
- B. Producing Facilities: Levers Federal No. 1 is 0.5 miles south.
- C. Oil Gathering Lines: Flowline will lay, not buried, on a straight line to Levers Federal No. 1.
- D. Other Lines: No other producing lines required.
- E. Rehabilitation: Pits will be backfilled and leveled as soon as practical to original condition. Commencement of rehabilitation operations will immediately follow removal of drilling and completion equipment from location. Rehabilitation of the surface is planned to be completed within 45 days from commencement.

5. Water Supply

Water will be supplied by flowline from Levers Federal No. 1 and hauled from a fresh water well NE of the location. See Exhibit "C".

6. Source of Construction Materials

Caliche will be hauled on the road right-of-way from an existing pit 0.3 miles east of location. See Exhibits "B" and "C".

7. Methods for Handling Waste Disposal

Waste Disposal: Well cuttings will be disposed in reserve pit. Barrel trash containers to be in accessible locations within drill site area during drilling and completion procedures. All detrimental waste will be hauled away, burned or buried with a minimum cover of 24" of dirt. See Exhibit "D" for location of pits. If well is productive, maintenance waste will be placed in special trash cans and hauled away periodically. Any produced water will be collected in tanks until hauled to an approved disposal system, or separate disposal applications will be submitted to the survey for appropriate approval.

8. Ancillary Facilities

None

9. Well Site Layout

Exhibit "D" shows the relative location and dimensions of the well pad, mud pit, reserve pit, etc. The reserve pit will be lined with plastic. The pad and pits are staked.
