

Proposed Development Plan for Surface Use

Amoco Production Company's Federal AA Well No. 1, Unit E, 1980' FNL & 1980' FWL, Sec 17, T-22-S R-26-E, Eddy County, New Mexico

1. Existing roads including location of exit from main highway.

Detailed map showing drillsite location in relation to the nearest town and all existing roads within one mile of the wellsite are shown on Exhibit A.

From Canal Street in Carlsbad, go west on west Lea Street 3.0 miles, turn West on Jones Street and go 3.5 miles. At this point, a new road will be constructed running South to the location.

2. Planned access roads.

An existing ranch road will be bladed and upgraded from Jones Street South to the drilling location. The new road will be approximately 2 miles long.

3. Location of existing wells.

All existing well within one mile radius are shown on Exhibit C.

4. Location of tank batteries and flow lines

If the well is commercially productive, the production facilities (i.e. tanks, separators, & treaters) will be produced into Tank Battery constructed on pad (See Exhibit D).

5. Location and type of water supply.

Fresh & brine water to be hauled by commercial hauler.

6. Source of construction materials.

Caliche will be obtained from an existing pit located 2 3/4 miles Northwest of well location. (See Exhibit B)

7. WASTE DISPOSAL

- a. Drill cuttings will be disposed of in the reserve pit.
- b. Drilling fluids will be allowed to evaporate in the reserve pit until the pit is dry.
