MULTI-POINT SURFACE USE AND OPERATIONS PLAN

Durham, Inc.
Stinking Draw Federal Well No. 1
1980' PNL & 660' FWL
Section 13, T-21-S, R-22-E
Eddy County, New Mexico
(Development Well)

This plan is submitted with Form 9-331C, Application for Permit to Drill, covering the above described well. The purpose of this plan is to describe the location of the proposed well, the proposed construction activities and operations plan, the magnitude of necessary surface disturbance involved, and the procedures to be followed in rehabilitating the surface after completion of the operations, so that a complete appraisal can be made of the environmental effects associated with the operation.

1. EXISTING ROADS.

- A. Exhibit "B" is a portion of the topographic map on a scale of 1" = 2000', showing the location of the proposed well site with detailed access road shown in red. The proposed location is situated approximately 27 miles northwest of Carlsbad, New Mexico, via the access road shown in red on Exhibit B.
- (1) Starting at the intersection of highways 285 and 137, 12 miles north of Carlsbad, go west on highway 137 8.8 miles.
 - (2) At this point, turn right (north) onto an unnumbered blacktop road. (This turnoff is indicated by a sign on the north side of highway 137, reading "Sitting Bull Falls" with an arrow pointing west.)
 - (3) After leaving highway 137, continue northwest for a total distance of 7.8 miles. At this point turn due north on a caliche road for a distance of 2.0 miles, then turn left at the gas well on another caliche road and proceed in a westerly direction 1.9 miles. The proposed new access road will begin approximately $\frac{1}{4}$ mile south of the Yates-Hilliard "BF" Federal Well No. 1x location (the existing caliche roads will be improved as necessary).
