CIGE

Bass Enterprises requests approval of TA status for this well. The well is currently shut in with tubing still installed, but no packer or bridge plug isolating the perforations from the casing. We plan to run a bridge plug and perform a casing integrity test within the next 30 days. The Carlsbad Area office will be notified in advance of this testing.

Bass is evaluating re-completion possibilities in the Bone Spring formation. Work is expected to start in late 1998 depending on results of geological mapping and studies being conducted in this area.
